HW_01 Investigating Scientific Fields and the Language of Science (convert to 10 point scale)

Criteria	Excellent	Satisfactory	Needs Improvement
Task 1: Depth of Research	Uses at least three credible references effectively to support detailed and insightful content.	Uses three references, but with limited integration or some questionable credibility.	Uses fewer than three references or sources lack credibility or relevance.
Task 1: Organization and Structural Quality	Clear, logical organization with well-developed paragraphs; meets the length requirement (~750 words, 3-4 paragraphs/page).	Organization is mostly clear but with some uneven paragraph development or minor deviation from length requirements.	Poor organization; paragraphs are underdeveloped or text is significantly shorter than required.
Task 1: Translation Quality	Translation accurately and fluently conveys the meaning of the original English text with proper grammar and vocabulary.	Translation conveys general meaning but contains some errors in grammar or vocabulary that do not obscure understanding.	Translation is inaccurate or incomplete, significantly hindering comprehension.
Task 2: Content Accuracy and Quality	Summary accurately captures key points and nuances from all specified excerpts (Introduction, 2.1, 2.2)	Summary includes most key points but misses some important details or nuances	Summary is incomplete or contains significant inaccuracies or misunderstandings of the excerpts
Task 2: Translation Quality	Accurate and fluent Spanish translation of the English summary with correct grammar and vocabulary	Translation conveys the main ideas with occasional errors in grammar or word choice	Translation is inaccurate, hard to understand, or contains frequent grammatical errors
Document Formatting and Presentation	Document is perfectly formatted according to Marron Style Guide .	Minor formatting errors present but overall follows Marron Style Guide.	Formatting does not follow the Marron Style Guide or is inconsistent throughout.

Assignment:

*** HW_01 [Due: 16 September 2025]

-- Task 1

Select one (1) field of science. You will become an "expert" in this field and will share your knowledge with the class. To begin your path to expertise, you will write, and then translate, a ~two-page account on the history of your selected field of science. The first part of the account will be dedicated to the general history of the field. The second part of the account will be dedicated to the history of the field in Mexico. For this assignment you should plan on 3 to 4 paragraphs per page for a total word count of not less than 750 words. You should provide at least three (3) references. Remember, your deliverable will be the original account, written in English, and the translation, written in Spanish. Be prepared to present and share your findings with the class. Please note that 'presenting and sharing your findings with the class' implies a somewhat informal presentation. I would expect about a 5 min overview of your findings with a focus on Mexico.

For this assignment and for all subsequent written assignments in this class (unless duly noted), we will use Marron's modified APA format. Specifically, documents will be written with:

- * Single-spaced text
- * 0.5 inch margins (left and right)
- * 12-point Times New Roman font, and
- * printed double-sided if possible

References, as needed, must be in a standard format (eg, APA). See "Marron_GeneralStyleGuide.pdf" in Teams under Class Materials.

Assignments must always be printed (i.e., hard copy) and submitted to the instructor on the due date (unless duly noted). Students should save copies of all assignments in PDF format.

-- Task 2

Read the following excerpts from Carli & Calaresu's "Language and Science" (pp. 2-7):

- * 1. Introduction
- * 2. Outline and history of the field
 - * 2.1. Definitions of science(s)
 - * 2.2. History of the field

Write a ~three-paragraph summary of the excerpts in English and translate the summary into Spanish. The format requirements above apply.
