**HW_10. Qs AI 2027 Report; Qs from “Bless Me, Ultima”
 (Convert to 10 pt scale)**

Criteria / Score	3 - Excellent	2 - Satisfactory	1 - Needs Improvement
Task 1: Qs from AI 2027 Report	Provides thoughtful, well-supported answers to the 26 questions based on the AI 2027 report	Provides somewhat thoughtful, and partially supported answers to the 26 questions based on the " AI 2027 " report	Poorly crafted responses and or missing responses to multiple questions
Task 2: Literary Analysis of "Bless Me, Ultima"	Selected answers to 12 questions from Chapters 5-8 (three per chap) are well-developed, insightful, and demonstrate critical engagement with the text; answers follow the Marron_StyleGuide formatting rigorously.	Answers address the questions adequately with some analysis; mostly follow formatting guidelines with minor inconsistencies; demonstrate general comprehension of the chapters.	Answers are brief, lack analysis, show limited understanding of the text, or fail to follow the formatting guidelines specified.
Document Formatting and Presentation	Document is perfectly formatted according to Marron Style Guide .	Minor formatting errors present but overall follows Marron Style Guide.	Formatting does not follow the Marron Style Guide or is inconsistent throughout.

Assignment:

****HW_10 [Due: 28 July 2026]**

--- Task 1

Read the AI 2027 Report either on-line at <https://ai-2027.com/> (preferred) or in "04_ai-2027.pdf" and answer the following questions:

1. Look through the "Who are we ?" section. Are the authors credible?
2. Do you use ChatGPT or any other AI-agents? If yes, do you consider the use of these agents part of your workflow?
3. OpenAI, Anthropic, DeepSeek, Google, and others ARE actually building massive data centers around the world. From Shanahan (and others), what is known about the relationship between emergence and scale in AI? What is happening in Queretaro, MX?
4. What scale of AI agents will be able to be built when the new data centers come on line?

5. OpenAI just released GPT-5.3, Google has recently released the Gemini 3 series, DeepSeek has released DeepSeek 4, and Anthropic Claude 4. Is it likely that all of these companies have more advanced models in the works?
6. At this moment in AI development (March 2026), what is the single most important skill for an AI?
7. What produces "drive" in AI agents? How are AI agents expected to be "controlled"?
8. AI agents have already shown documented emergent properties such as being sycophantic. With respect to emergent properties, what is highly likely when new, more powerful AI agents come on line?
10. What are long-horizon tasks and why do you think AI agents are not yet good at executing such tasks?
11. China does not appear to be falling behind in AI research. Do you agree?
12. The U.S. Pentagon has already contracted AI services and will undoubtedly seek to incorporate AI agents into most, if not all, defensive and offensive weapon systems. Anthropic recently stood up to the Pentagon for wanting to use Anthropic's AI agents contrary to Anthropic's use requirements. What happened?
13. What are the (projected) capabilities of Agent-2? What are the dangers?
14. Why would any corporate (or international) espionage want to steal an AI model's weights?
15. An inflection point in AI capability is the realization of a superhuman coder. Why?
16. In terms of AI research and development (R and D), what does "vibe coding" look like in March 2027? How has prompt engineering evolved?
17. In April 2027 R and D becomes very concerned about AI agent alignment. Why?
18. What exactly is Artificial General Intelligence (AGI)? Would we (i.e., citizens of the world) even know when it happens?
19. What does it mean to have "a country of geniuses in a datacenter"?
20. CAT tools are one type of "AI wrapper startups". What does this mean?
21. As of August 2027, the report predicts AI agents have blown through AGI and are now superintelligent. What does this term mean and how might this event affect the geopolitics of the world ?
22. By September of 2027 the report predicts that the newest AI agents cannot be understood either by humans or by older AI agents! What are predictable verifiable events/outcomes that would indicate this has indeed happened?
23. What is the main (terrifying!) problem with Agent-4? Why is this terrifying?
24. A critical junction is reached where humans must decide whether to slow down AI research (because of misalignment) or continue without guardrails. The report predicts this is likely to happen in October 2027. Given historical trends, what do you predict will happen, Race or Slowdown?
25. Briefly summarize what happens in the Slowdown scenario.
26. Briefly summarize what happens in the Race scenario.

--- Task 2

Read Chapter 5, Chapter 6, Chapter 7. Chapter 8 of "Bless Me, Ultima." Select and answer just three (3) questions from the list of questions for each chapter. The questions can be found in the document, "UTECA_StudyGuide_Bless-Me-Ultima.txt. Be sure to format your answers correctly (see Marron_StyleGuide.pdf).
